NOTES TO THE FINANCIAL STATEMENTS

11. RISK MANAGEMENT POLICIES (CONTINUED)

The Fund is exposed to credit risk for its cash balance only. The exposure is not significant as the cash balance is maintained with a local bank which has sound credit rating.

Equity price risk

Equity price risk is the risk that the fair value of an equity investment may fluctuate as a result of changes in market prices. The Fund is exposed to equity price risk arising from its held for trading investments.

The Fund Manager endeavours to minimize this risk including concentration risk through continuous monitoring of market conditions and diversification of its investments across various sectors of Saudi Arabian equity market.

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in arranging funds to meet commitments associated with settlement of financial liabilities and redemption of units.

The Fund's securities are considered to be readily realizable as investments are made in quoted equities and can easily be realized at any time. The Fund Manager monitors the liquidity requirements on a regular basis and ensures that sufficient funds are available to meet any commitments as they arise.

Managing the risk of Net Assets attributable to Unitholders

The objective of the Fund Manager when managing the net assets attributable to the unitholders is to secure the Fund's ability to continue in order to provide unitholders with the highest returns and ensure that reasonable protection are given to the net assets attributable to the unitholders.

The Fund Manager manages its investment portfolio and other assets through monitoring revenue generated from net assets and making required adjustments in accordance with market changes.

12. FAIR VALUES OF FINANCIAL ASSETS AND LIABILITIES

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable willing parties in an arm's length transaction.

Financial instruments consist of financial assets and financial liabilities. The Fund's financial assets consist mainly of held for trading investments and financial liabilities consist of management and custody fees, Board of Directors' fee, Shari'a committee members fees and certain accrued expenses.

For investments traded in an active market, fair value is determined by reference to quoted market prices. The fair value of other financial instruments is not materially different from their carrying values. Fluctuations in stock market can cause fluctuation in the investment portfolio as well.

13. LAST VALUATION DATE

The last valuation day of the year was 29 December 2016 (2015: 31 December 2015).
